

Chest X-Ray 2 Day Course

22nd & 23rd September 2021

The Chest X-ray is the most commonly performed diagnostic radiographic examination. Interpretation may appear to be simple, but in fact requires a strong understanding of anatomical, pathological and radiographic principles. This two day course will help you develop or refine your systematic approach to chest X-ray review.

AGENDA:

DAY 1 - virtual

DAY 2 - held at the academy
